# FINANCIAL AND COMMERCIAL

#### MONEY AND STOCKS.

wew York Financial Market. NEW YORK, Jan. 8.-Money-Easy at 1@1% pe ceut : closed offered at 1 per cent.

Prime Mercantile Paper -4 1/26 per cent. Governments-Easier for the 4 per cents. Railway Ponds-Generally firm. State Securities-Quiet.

Speculation at the Stock Exchange was buoyant and prices showed an advancing tendency throughout the day. Such slight reactions as occurred were invariably formed by purchases for both short and long account, and prominent bears, in their attempts to cover, came in competition with smaller shorts, who became alarmed and bought steadily from opening to close. The principal reason for the sudden change in the temper of speculation was the non confirmation of rumors current yesterday concerning the alleged embarrassment of leading firms and capitalists. Buying was increased by advices regarding the resumption work by many iron mills and street works, by the statement that the Pennsylvania Railroad Company would act in conjunction with the coal combination and by a further advance in grain. Considerable lines of stocks were taken by brokers here on telegraphic orders from Boston, Chicago and other leading cities, although the entire list shared in the upward movement. Union Pacific and Western Union, on account of the large short interest in them were the chief objects of interest. Coal stocks, Vanderbilt shares and grangers also figured conspicuously in the advance. Transactions aggregated 354,900 snares, of which 97,000 were Lackawanna, 26,000 Lake Snore, 36,000 Northwestern, 19,000 New York Central, 75,000 St. Faul, 22,000 Union Pacific, and 37,000 Western

In the mining market Consolidated Pacific sold at 95. In the afternoon Horn silver sold at 275, Chrysolite at 85, buyer 60, and Central Arizona at

#### PARIS, Jan. S. - Rentes, 791, 60c. COMMERCIAL.

Missouri Pacific.

The exportation of dry goods last week from the ports of the Atlantic cities were double the amount of exports in any previous week. The market remains firm, and trade is rather better in this market than heretofore reported. Groceries continue to do a fair business, with prices un changed. Sugars are very firm, and leading sta ples generally. Dried fruits are unchanged for the domestic article, and raisins in foreign are considerably advanced. In the drug market lodine has gone skyward. In vegetables cabbige and onlone have gone upward. Eggs have taken a drop of 4c per dozen.

Wheat-"About the same," as to price, and feeling covers the situation. Very little arriving and offerings scarce. Futures develop some inquiries but sellers fail to materialize. New York Mc higher, Baltimore Mc lower, while Chicage is 11%c firmer.

Corn-In local markets all color grades are in good demand, with only fair offerings, while white grades show an indifference upon the part of buyers, and prices have generally weakened. Futures continue dull and receipts are light. New York at noon was 16c higher, Baltimore 14c off with Chicago %e firmer.

Osts-Steady at quotations with a fairly active demand for cash shipments. The following table snows the amount of grain

	MT.	Corn.	Oats.	Bye.

## The Eigin Dairy Region.

[Philadelphia Record.]

The region near Elgin, Ill., is famous for the production of the choicest butter and cheese made in the United States; and an account of the methods practiced there will be interesting and profitable. The soil is the usual black loam noticeable on the prairies, and grass grows spontaneously wherever it can secure a stand. No crops are cultivated except corn and oats, and every farm is a dairy. Elgin is the center of the district, and contains no creameries within the city proper, but the enterprising dairyman of the surrounding country, by the organization of a Board of Trade and Exchange, succeeded in attracting customers for their product from all sections. The butter and cheese are sold by sample in the rooms of the Board, and every one who uses the rooms as a medium for the sale of goods is compelled to furnish articles in strict accordance with the samples. The butter and cheese are graded and classified, and the prices obtained vary, of course, with the quality of the products. Any community of farmers may thus easily build up a market fer their goods in the same manner, the secret of success being that all articles are sold upon their merits Grass being a staple crop, and seldom a

failure, the dairymen have excellent pasturage in summer with an abundant supply of hav for winter, while the large farms are provided for with silos, and ensilage is made an important adjunct to the hay. The corn and oats are fed usually in the ground con-NEW YORK, Jan. 8—Cotton — Duil; fatures steady; January, 11.13c; February, 11.11c; March 11.15c; April, 11.27c; May and June, 11.51c; Jaly, 11.61c; August, 11.72c; September, 11.38c; October, 10.90c. Wheat is not grown, nor are the old) afflicted with nervous debility, loss of

April, 49%@49%c, closing at 49%c; May, 49% from the milk by the centrifugal process, 50c, closing at 50c, Oats-%@1%c higher; receipts, 53,000 bu.; exports, 24,000 bu.; mixed, 36 by machinery. The stimmed milk is made and the entire work of butter-making is done by machinery. The skimmed milk is made into cheese, the fat being provided in the shape of lard, but such cheese is not, however, sold at the same price as that made

from the entire milk. The dairymen have long been accustomed to the practice of buying fresh cows and selling those that become dry, the calves being sacrificed when only a few days old: but as the Holsteins have been introduced, and the results from such cows so superior to the former stock, dairymen are learning the fact that it is to their advantage to raise their own cows, which are certain to yield largely, instead of buying any kind of stock that may be offered. In addition to the large quantities of milk used by the creameries, trains of cars daily carry thousands of cans to Chicago, the prices ranging from two cents per quart at the creameries to three and four cents in the city.

Although on many farms sufficient food is grown for the stock, yet the majority of dairy men purchase bran, shipstuff and oilcake for feeding and save their manure carefully. This practice assists very materially in retaining fertility, as the constant marketing of the elements of the soil, in the shape of milk, would, in the course of time, cause the soil to become impoverished. Being naturally very fertile, and well adapted to nearly all kinds of grass, the farmers find that by the sale of milk alone they can derive a larger profit than by growing crops for market. A glucose factory furnishes refuse, which is utalized by the farmers, and with their whole attention given to dairying, and the feeding of the soil annually, they have but little tear of failure. By concentration of efforts the Elgin dairymen have created a market for their products near their farms, and a ready sale is found for all their produce. The production of milk, butter and cheese is very large, and bids fair to increase on each farm every year, as improvement is taking place annually.

## How to Make Her Perfectly Safe.

[Harper's Bazar.] Every toboggan sled carries a lady, and there is just enough danger to make it de-

ightfully exciting. The lady takes her seat on the sofa cushions, her feet firmly braced against the front piece, which curls over and covers them, her hands grasping the rail at either side, the body slightly thrown backward. All will go well if she does not move, but woe betide the girl who stirs an inch to the right or left The steerer takes his place behind. His position is optional, but the general mode is to lie on the left side, propped on one arm, with the right leg extended, which is used

"Our invariable rule," said a friend, "is to hold on to your girl, and there are critical mogents when a very tight hold is absolutely necessary.

Not According to Mr. Cleveland's Methods. [Washington Evening Star.]

It is said that Mr. Cleveland's letter to George William Curtis is the result of a consultation with some of his advisers, and was intended not so much to reassure the Civil Service Association as to put a stop to the | Of ce. receipt by him of hundreds of applications for Government positions, personal and by letter. The object was to answer all these in one sweeping declaration.

Aunt Rachel's Joy.

Rev. W. B. Evans, Washington, D. C. writes: "Aunt Rachel, the dear old colored saint, who has been a constant sufferer with Inflammatory Rheumatism for sixteen years, has been greatly benefited by Athlophores. I consider it almost in the light of a miracle. She is almost beside herself with cy. The pain has all left her limbs. A little stiffness remains, but another bottle will effect a permanent cure. It is indeed a most wonderful medicine. I think it ought to be spread throughout the length and breadth of the land."

Among the native plants in the West of interest to the farmer are the dreaded loco weeds of the plians. Horses are said to go crazy when they feed upon them, and other stock is affected, though in a less degree. Late investigations prove that two plants belonging to the pea and bean family-Astragalus mollissimus and sophora sericea -contain virulent poisons. Oxytrophis Lamberti, another plant of the same family, is suspicious. These plants come up in spring before the grass, and horses are said to like them. They usually prove fatal.

"The leprous distilment, whose effect Holds such an enmity with blood of man, That, swift as quicks: Iver, it courses through The natural gates and alleys of the body," and causes the skin to become "barked about, most lazar-like, with vile and loathsome crust." Such are the effects of diseased and morbid bile, the only antidote for which is to cleanse and regulate the liveran office admirably performed by Dr. Pierce's "Golden Medical Discovery."

THE interesting information that Celia Thaxter, of Boston, has more orders than she can fill for copies of her poems, adorned on the margin of water-color sketches by her own band, naturally leads to the inquiry how Baron Tennyson presumed to send to this country his poem on "Freedom" with. out at least an accompanying chrome."

A Precious Gift.

The most delicate, perful and refined of holiday presents that con a be offered to a lady or person of taste iad doubt, a case of that most exquisme, refreshing and lasting of all perfumes, the genuine "Murray & Lanman Florida Water." Sold by all druggists, perfumers and fancy goods deal ers. As there are imitations of this article. see that the real Murray & Lanman Florida Water is obtained.

Lambs can be taught to drink cows' milk, and by adding estmeal to the milk they will grow rapidly. From the first day of its existence until marketed the young lamb must be kept warm and comfortable, as it will make but little progress, even with te best of food, if it suffers from cold or exposure. Durkee's Salad Dressing and Cold Meat Sauce is

made from the freshest, purest and choicest con-diments obtainable. In "sing it, waste, labor, anxiety and disappointment are prevented.

FITS: All Fits stopped free by Dr. Kline's Great Nerve Restorer. No fits after first day's use. Mar-velous cures. Treatise and 82 trial bottle free to Fit cases. Eand to Dr. Kline. 921 Arch st., Phila., Pa Young Men!-Bead This. The Voltaic Belt Company, of Marshall,

Mich., offer to send their celebrated Electro-Voltaic Belt and other Electric Appliances

farms supplied with a variety of fruit, with | vitality and manhood, and all kindred troubles.
